

RMS Engineering and Construction Pty Ltd

ENVIRONMENTAL POLICY STATEMENT

RMS Engineering and Construction Pty Ltd recognise that a workplace can impact on the environment through its work practices, purchases and disposal methods. RMS Engineering and Construction Pty Ltd shall minimise the adverse effects it may have on the environment through actively undertaking the following;

- All company undertakings will comply with legislative obligations and industry environmental best practices.
- The company will provide resources to proactively monitor and review existing work methods and procedures to minimise environmental impacts.
- Ascertain the environmental impact of all services provided and products purchased, from the manufacturing process to the disposal stage.
- Promote effective waste reduction and recycling methods within the workplace and community.
- Train and encourage employees to participate and identify environmental risk within the workplace.
- Integrate environmental management into our overall management system to demonstrate to our clients, RMS Engineering and Construction Pty Ltd's commitment to responsible environmental management.
